

GREENIN MISSION

October 20, 2007

On March 4th, 2007 the congregation voted to make the environment and global warming their main social justice issue for the year. The Green-In is a response to this mandate. It is an attempt to teach people how to reduce global warming and promote environmentally sustainable living in a fun, free, family-oriented way.

For Cedar Lane members: We hope that this event will inspire you, the committee you are on at Cedar Lane

To do more to help the environment.

For people who don't go to Cedar Lane, we hope that this will inspire you to do something to help the environment in your religious organization, school, neighborhood, and/or business.
